

POLARIS RZR XP 1000 · NON-TURBO

RZR XP 1000 A/C KIT

Real air conditioning for the **Polaris RZR XP 1000**, 2-door and 4-door — powered by RedDOT's **patented, belt-driven drive system**.

30%

Up to 30% more cooling than factory-installed systems

104°F

Climate wind-tunnel tested with full solar load

3

Large adjustable vents for targeted cooling

60yrs

RedDOT experience in heavy-duty mobile HVAC

COOL AIR, WIDE OPEN

The RZR XP 1000 was never built with air conditioning in mind, and its magneto charging leaves little power to spare. RedDOT's patented, belt-driven drive system solves that, giving the XP 1000 a dedicated power source for a true A/C compressor. Paired with a roof-mounted two-fan condenser

and an evaporator with three adjustable vents — mounted under the dash on 2-door models or to the headliner on 4-door models — the system delivers targeted airflow and serious comfort without slowing you down.

HOW IT WORKS

1

DRIVE

Belt-driven power from the engine

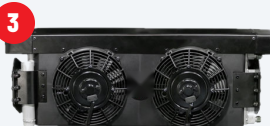

2

COMPRESSOR

Pumps refrigerant through the system

3

CONDENSER

Two fans shed heat outside the cab

4

EVAPORATOR

Cold air through 3 adjustable vents

WHY REDDOT

PATENTED DRIVE SYSTEM

Belt-driven U-1001-0P drive system overcomes magneto limits to power a true A/C compressor.

WIND-TUNNEL TESTED

Proven in RedDOT's climate wind tunnel at 104°F with full solar load.

3 ADJUSTABLE VENTS

Three large adjustable vents put cooling where it's needed, with push-button fan and A/C control.

UP TO 30% MORE COOLING

RedDOT rates its A/C kit at up to 30% more cooling than factory-installed systems.

MADE FOR OPEN CABS

Designed for open-cab RZR's: targeted airflow and serious comfort without slowing you down.

DEALER INSTALLED

Plug-and-play design installed by trained RedDOT dealers for minimal downtime.

WHAT'S IN THE KIT

A/C KIT REQUIRED

U-1001-0P

Drive System Base Kit – Polaris

U-1002-0P

Compressor – UTV

U-1008-0P

Condenser Assembly – 2-Fan (RZR)

U-1009-0P

Evaporator – A/C Unit

U-1035-0P

A/C Installation Kit – Polaris

EVAPORATOR MOUNT REQUIRED

U-1020-0P

A/C Bracket Kit – Under-Dash
2-door models

U-1046-0P

Evaporator Mount Bracket Kit – Headliner
4-door models

Mounting by model: 2-door models mount the evaporator under the dash with U-1020-0P; U-1046-0P headliner mounting is an optional alternative for 2-door. 4-door models use the U-1046-0P headliner mount.

! Requires hoses and fittings for installation. See dealer for recommendation.

OPTIONS & ADD-ONS ADD MORE

DRIVE COOLING KIT

Optional drive pressurizer

U-1018-0P

Drive Cooling System Kit (Drive Pressurizer)

HURRICANE ROOF FAN

Forced-air cab cooling

U-1004-0P

Hurricane Rooftop Fan

U-1021-0P

Pigtail Harness – for longer wire runs

VEHICLE FITMENT

Polaris RZR XP 1000 2-Door

Non-Turbo · 2011-Current

Polaris RZR XP 1000 4-Door

Non-Turbo · 2011-Current

Does not fit Turbo models, Pro R, Trail or General.

BUILT BY REDDOT

Founded in 1965 and 100% employee-owned since 2000, RedDOT Corporation engineers heavy-duty mobile HVAC and holds more than 25 domestic and international patents. Our systems are available exclusively through carefully selected and trained dealers.
